

MOBILE CLIENT PROVISIONING WEB SERVICE**ABSTRACT OF THE DISCLOSURE**

- 5 A system and method for provisioning mobile clients on a network for use of network service applications via a provisioning Web service. At least one mobile terminal is coupled to at least one network service via the mobile client provisioning Web service. The provisioning Web service provides a single point of interface to the network service for provisioning the mobile terminal. The mobile
- 10 terminal is provisioned by the provisioning Web service for use of at least one application provided by the network service, where the provisioning includes at least configuring the mobile terminal for use of the application, and delivering the application to the mobile terminal.
